Requirements from customer -> solutions from coders

PAGE TEMPLATE 1

- HERO
    - Hero with H1 on color block in maxi size
    - Color bar beneath (decobar)
    - The color of the block + bar set by user in some sort of field (or taxonomy?)
    - Child pages inherit the color block + bar (there might be cases where this is not the desired behavior, because some pages belong to several sections)

    HERO SOLUTION:
    åitrjhårhj rioj äperjo äwoerjghs

- LAST MODIFIED date (in block?) Needs visibility setting (on/off). Some pages wide, some narrow content
